

Step-Tec **SEP** Spindle Exchange Program

Maximize your machine's uptime and reduce total cost of operations with the Step-Tec Spindle Exchange Program (SEP).

With Step-Tec Spindle Exchange Program, any damaged or broken spindle can be replaced with a Step-Tec factory reconditioned and certified spindle. The exchange on site is realised through the original machine builder. Customers may also be eligible for a preventive exchange through a Preventive Spindle Diagnosis Program. Ensure your long-term success with support from Step-Tec's expertise and comprehensive range of Spindle Service Solutions.

Your benefit

- Minimize production downtime
- Receive spindle delivery within 24 hours
- Original warranty reset
- Improve application performance
- Highest reliability due to the latest technical upgrade
